INJECTION MOLDED LEAD OPTIONS

*\*Please note, all neon products are NOT field-trimmable*

MOUNTING OPTIONS

*For all ceiling installations, we recommend the use of either the bendable serrated profile, or the rigid aluminum profile*

SKU	Dimensions	Mounting
 <div>NF/SP-CH-NEON-120V-SB-BRACKET White Aluminum Bracket</div>	width: 0.39" height: 0.79" length: 0.72"	1 clip every 18" mounts behind neon (1 screw/clip, 2 clips/pack)
 <div>NF/SP-CH-NEON-120V-SB-CLIP Clear PC Clip</div>	width: 1.25" (includes flanges for screws) height: 0.88" length: 0.56"	1 clip every 18" mounts over front of neon (2 screws/clip, 2 clips/pack)
 <div>NF/SP-CH-NEON-120V-SB-FLEX Silver Bendable, Serrated Aluminum Profile</div>	width: 0.51" height: 0.87" length: 10 meter rolls	1 screw every 18" To secure this channel to the mounting surface, screws can be installed in the gaps at the bottom/base of the channel as needed. Screws can be installed on straight runs (gaps will be normal/ screws can secure the channel), and on the inside edges of curved runs. Screws won't fit on the outside edge, because the gaps will be too big. The endcaps on the non-wired end will rest inside the channel. On the wired end, endcaps with SIDE (left/right) lead wires will rest outside the channel; endcaps with BACK lead wires can rest inside the channel.
 <div>NF/SP-CH-NEON-120V-SB-1M Silver Rigid Aluminum Profile</div>	width: 0.51" height: 0.87" length: 1 meter	1 screw every 18" (channel has pre-drilled holes) Neon can be pressed into the channel, using even pressure, working from one end to the other. The endcaps on the non-wired end will rest inside the channel. On the wired end, endcaps with SIDE (left/right) lead wires will rest outside the channel; endcaps with BACK lead wires can rest inside the channel.

NOTE: Must use appropriate components that comply with local codes if installed outdoors (weather-proof connectors, cord covers, enclosures, etc). This product is NOT field-cuttable, which would void the IP rating and warranty.
